

Els van der Meulen/Netherlands:

19. January 2006

Dear sirs,

Interested in Monty's story?

Having tried all kinds of 'iron'-irons, I decided to take them off and ride my competitions without. My horse Monty R. has 'problem feet': they grow very fast at the front. No irons was the best option at that time. Two years of success followed and we were ready to start in longer classes, however, this would not be fair without irons. In Holland we have to ride and train a lot on hard surfaces.

We decided to try your **easywalkers**... Monty became more supple and his strides were much longer! He loved to walk even more then before!

Our first international competition, Fasna trail 2005 over 90 km's, we ended second (first Dutch combination!)

Coming year we will use the **easywalkers** again, and as a lot of people know Monty, I am sure a lot of my 'colleagues' will follow; and I, I am happy for their horses!

Els van der Meulen and Monty R.
